June 18-21, 2012 • Boston, MA USA

Supporting Biotech Crop Development in Less Developed Markets

Why exactly do public research organizations in developing countries struggle to keep pace with advances in the developed world? How can private organizations and governments promote better collaboration and engagement between the more-and less-developed countries, to overcome these challenges? This session will present these challenges in more detail, discuss how the developed world public and private sector can more substantively engage to overcome these challenges, and offer some possible new approaches to north-south collaboration in agricultural biotechnology.

June 20, 2012

10:00 - 11:30 AM

Room Number: 211

Session Number: 1139

Organized by:  **USAID**
FROM THE AMERICAN PEOPLE

Participants

Denis Kyetere, Executive Director, African Agricultural Technology Foundation

Roger Salameh, Vice President for Business Development, Arcadia Biosciences

Judy Chambers, Director, Program for Biosafety Systems, International Food Policy Research Institute

Moderated by:

Robert Paarlberg, Author & Professor, Wellesley College, Associate, Weatherhead Center for International Affairs, Harvard University
